Leaving Dirty Water Spots on Carpet

1. Remove the Water Tank and Solution bottle from the machine.
2. Tilt machine backwards so it is resting on its handle.
3. Wipe all dirt, hair, and lint from the underside. Clean area between the dual PowerBrushes.
4. Empty dirty water tank and fill clean water tank with water only.
5. Go over previously cleaned areas, working in small sections.
6. Set to rinse and run over the soiled spots until only clean water is suctioned up.
